anm

Protect your technology investment

Choosing the right technology is just the beginning. We use a proven project methodology to install, deploy, configure, test and document the products, services and systems we use. We also assist with end-user adoption and managed services to ensure success over the long term.

Questions to consider:

› Are you equipped to take on new project deployments with existing resources?

› What opportunities for improvement did you see from your last IT project?

› What processes do you have in place to ensure successful end user adoption?

Professional Services play a key role in our four-step solution methodology.

› Detailed Planning and Design

› Solution Deployment

› Final Documents

› Knowledge Sharing

› Support

› Adoption Assistance

Manage — Discover — Design — Implement

WHAT SETS US APART

› Dedicated and experienced project managers who use a proven project methodology

› Located near you, gaining better understanding of your organization

› Staffing consistency across projects

› Greater emphasis on risk mitigation throughout all phrases, reducing scope and budget creep

› Customer satisfaction tracking to ensure the highest level of service

We offer:

› Assessments

› Installation and deployment

› Testing and configuration

› Implementation

› End-user adoption, training and education

› App development

WHAT YOU CAN EXPECT

› Keep your operations running smoothly with a dedicated project manager who understands both your technology and your business needs

› Protect your investment through in-depth training that will drive end-user adoption over the long term

› Gain peace of mind knowing that ANM has experience with projects of any size

We'd love to hear from you.
