

## Security

# Manage risk from every angle

Securing data and keeping it private is one of our industry's most complex challenges. You are tasked with driving productivity, collaboration and remote access, but what about the risks? How do you embrace innovation and cloud-based technologies that create a data-centric security program? We understand these pressures. That's why security isn't just a service we offer — it's part of everything we do.

Whether you're already deep into your digital transformation journey or just setting out, ANM is your trusted partner, ready to lead the way in security-driven transformation, promising not just risk mitigation but success with tangible business outcomes. It's time to view cybersecurity not as an add-on but as a strategic imperative, intricately woven into the very essence of your business.

Security isn't just a service we offer — it's part of everything we do.

- Vance Krier, ANM CTO

## Our Approach:

- › **Strategic Integration:** Effective risk management must be a foundational element intrinsically woven into business strategy. To achieve this, our engineering teams engage in close collaboration, integrating cybersecurity discussions into all facets of ANM's services, from the initial planning stages to continuous operations.
- › **Holistic Protection:** Acknowledging that cybersecurity is a collective responsibility, our engineering teams work together, conducting thorough analyses of potential threats, vulnerabilities, and industry-specific risks. It is through this collaborative effort that we craft holistic solutions, addressing specific challenges while aligning with broader business objectives.
- › **Proactive Risk Management:** By infusing cybersecurity discussions throughout technology stacks, we identify potential risks before they manifest as threats. This proactive approach enables us to effectively mitigate risks, minimizing potential disruptions to your business. With ANM as your trusted partner, rest assured that risk management is not just a process; it's a proactive, collaborative endeavor aimed at ensuring the resilience and success of your business.

## WHAT SETS US APART

- › Holistic, risk-based security approach utilizing integrated security platforms
- › Thorough security reviews that identify your unique risks
- › Security automation utilizing industry-proven and integrated platforms
- › Architecting and deploying Zero Trust Networks
- › Developing custom apps on platforms to address your unique risks and enhance your security capabilities

## KEY BENEFITS

- › **Enhanced Security:** Realize a robust security posture by safeguarding data, intellectual property and customer trust, while minimizing risk.
- › **Regulatory Compliance:** Stay ahead of compliance requirements while aligning technology investments with compliance regulations.
- › **Business Continuity:** Become more resilient, ensuring business continuity and minimizing downtime.
- › **Competitive Advantage:** Proactively address risks and boost customer confidence, attract new clients and strengthen existing partnerships.

# Security is intrinsic to all we do.

Our work begins by diving in and examining your unique risks. We specialize in technology-specific safeguards and developing solutions to ward off attacks in real time and mitigate threats before they happen. You'll have complete confidence that when something happens, we'll be there to help you respond and minimize impact.

## Network Security

Our network security services are designed to safeguard your network infrastructure, ensuring resilience against evolving cyberthreats. From industry-leading firewall solutions to intrusion detection and prevention systems, we offer a multi-layered approach that fortifies your network against unauthorized access, malware, and other potential vulnerabilities.

Network security partners include Cisco, Fortinet and Palo Alto.

## Email Security

Protect your frontline defense against email-born threats and ensure the integrity of your communication channels. From robust anti-phishing measures to real-time threat detection and encryption solutions, ANM's email security services provide a multi-layered shield against malicious attachments, spam, and sophisticated phishing attempts.

Email security partners include Cisco and Proofpoint.

## SASE/SSE

Discover the future of secure and efficient networking with ANM's SASE (Secure Access Service Edge) and SSE (Security Service Edge) solutions. With a SASE architecture and SSE services, we bring security to the edge, ensuring that users and devices enjoy secure access to applications, regardless of their location.

SASE/SSE partners include Cisco, Netskope, Palo Alto and Zscaler.

## Cloud & Data Center Security

ANM's cloud and data security services offer a comprehensive suite of solutions to fortify your organization's data integrity and security in the cloud. From robust encryption and access controls to proactive threat detection and compliance management, our services are tailored to address the complexities of safeguarding sensitive information across cloud environments.

Cloud and data center security partners include Cyera, Varonis, Wiz, and Dazz.

## Endpoint/MDR/XDR

ANM's Endpoint Protection, MDR (Managed Detection and Response), and XDR (Extended Detection and Response) solutions converge to create an impenetrable shield for your organization's digital assets. Our Endpoint Protection ensures the security of devices within your network, employing advanced threat detection and prevention mechanisms. While MDR takes it a step further, offering continuous monitoring, threat hunting, and rapid response to potential incidents, enhancing your overall security posture. With XDR, we integrate threat intelligence and insights from across your entire IT environment, providing a holistic view for comprehensive threat detection and response.

Endpoint, MDR and XDR partners include Cisco, CrowdStrike, Arctic Wolf, Critical Start, Red Canary and Palo Alto.

## How We Deliver

ANM's advisory services leverage seasoned cybersecurity experts who collaborate closely with your leadership to assess risks, define security strategies, and create solutions that align with your business objectives. From risk assessments to policy development, our advisory services lay the foundation for a strong cybersecurity posture.

Complementing this, our delivery services execute on these strategies, providing end-to-end implementation, integration, and management of cybersecurity solutions. ANM's expert team ensures a smooth transition from strategy to execution, delivering tangible outcomes and empowering your organization to navigate cybersecurity complexity with confidence.

## Innovate with Confidence

With ANM as your trusted cybersecurity partner, rest assured that our strategy revolves around making security an inseparable aspect of your digital journey. Embrace the confidence that comes from knowing that, with us, cybersecurity is not just a service; it's an inherent part of the solutions we deliver and a pivotal catalyst for driving your business success.

We'd love to hear from you.
